## THE PLUCK-ME STORES

The Miners Will Consult With the State Attorney General.

WILL HELP FELLOW LABORERS. Proposed New Motive Power for Street Rail-

way Lines in the Cities. THE PROPOSED SHADE BRANCH SCALE

The Railroad Miners' Convention, held at Knights of Labor hall, yesterday, was a very important one. John D. Conway presided and Thomas Kennedy acted as Secretary. There were 35 delegates present, representing 43 mines. The reports of the delegates was the first business before the meet-ing, the object of which was to consider the "pluck-me" store system. Some of them said that the mines were idle because the operators refused to employ men who do not deal at their store. Others reported that the res at their mines had been closed by the

A committee on resolutions was appointed and the convention adjourned for dinner. way was appointed to call on the merchants of the two cities and solicit financial aid in fighting the company store system. If these stores are abolished the trade of the city merchants will be greatly increased. Another committee was appointed, consisting of Messrs, Welch, Conway and John Flannery, to consult with the Attorney General of the State relative to the law on company stores.

The Committee on Resolutions then reported the following, which were unanimously

adopted: WHEREAS, The delegates of the railroad miners of this district on May 23, gave expression to their views on the company or "pluck-me" store

ave not been removed or mitigated; therefore Resolved. That we see no other proper way to see this question fairly than to insist on pay-sent of wages in full in cash and the abolition of

proper way to prevent the operation of such sitores.

Resolved, That we appeal to a friendly public to contribute to a fund to defray necessary expenses and in supporting victimized miners who suffer for their participation in this movement, and that we ask all fair employers to join us in opening their mines to victimized fellow-workmen with whom we believe it is our duty to share our work, as it is all we have to give as our donation. Resolved, That a convention be called to meet July 5, and that in the meantime the Executive Board be kept in the field, and that the officers of the organizations be requested to saist and continue to give this movement their unqualified and carnest support, and that due notice be given officially to each mine committee that a convention will be held.

Mr. John Flannery, of the Trades Journal, the organ of the miners, presented his resigna-tion as Treasurer, taking the ground that he is not eligible, not being a member of the Execu-tive Committee. He was promptly made a member of that body and his resignation was

## A NEW MOTOR LINE.

The Transverse Street Railway to be Run Without Horses-Enough Power to Sell -An Experimental Line. Rapid transit in the two cities will receive

inother acquisition in a new cable road, which will be operated from the B. & O. railroad lenot on the Transverse street car line. An application will be made for a charter by a number of gentlemen, who intend to form a corporation under the name of the Allegheny Traction Company. The names of the incor-porators are James A. McDevitt, C. L. Magee, Joshua Rhodes, John D. Nicholson, John H. Dalzell, George B. Hill and A. C. McCallam,

my, whose members are all interested in the absverse street car line intend to introduce Transverse street car line intend to introduce electric or cable motive power on overy street car road in Allegheny, and they are only deciding upon the Transverse line as a starter. The road will be run over the same route as the horse cars are running at present, and operations will be commenced as soon as the charter is granted. All the preliminary arrangements for the completion of the road have already been made and it is expected that the cable cars will be running over the road by Christmas.

hristmas. One of the gentlemen interested in the road, one of the gentlemen interested in the road, when asked whether a cable could be run across the Northside bridge, stated that he did not think there would be any difficulty on that account and outside of that the entire road is as well suited for cable as horse power.

"Our intention is," said one of the incorporators, "to establish a motor company with the view of supplying motive power to some of the street car lines already in operation in Allechens."

gheny."
"Does that include the Allegheny and Man-"No. because we are not stockholders in that company. Of course, if the directors of the Allegheny and Manchester line want us to supply them with motive power we can do that."

Then, continuing, the informant intimated that while he did not have direct authority to

that, while he did not have direct authority for saying so, he believed that within a short time all the street car lines in Allegheny would be consolidated and absorbed by one company.

Whether this consolidation will include the Picasant Valley car line or no, the gentleman relaxed to state. man refused to state.

The capital stock of the proposed Allegheny The capital stock of the proposed Allegheny Traction Company is \$350,000.

It is now stated by officers of the Central Traction line that they do not expect to have it in operation before the middle of November. About 80 days were lost on account of the Johnstown disaster, and 60 days on account of the difficulty in getting a perfect title to the property on which the power house is to be erected. Hereafter, however, the work will be pushed with all the energy possible, and no more time be lost.

THE SHADE BRANCH SCALE. The Pittsburg Delegation Departs for New

York to Arrange It. President W. J. Smith, of the American Flint Glass Workers' Union, and the Pittsburg delegation of workers, left last night to attend the conference in New York to-day on the Shade list prices for the next fire. The committee consists of James Arbogast, of L. U. 35, Philipsburg; George Engstron, L. U. No. 6, Pittsburg; John Morrell, L. U. No. 80, Fes-

Pittsburg; John Morrell, L. U. No. 80, Festoria.

No trouble is expected, as no material change in the present lists is expected. The workers have an advantage over the Pittsburg manufacturers, as none of them belong to the manufacturers organization with which the workers union are dealing. The Eastern men and the workers' committee arrange the prices, and the stade men in this section of the State who have nothing to do with the arranging of wages are compelled to pay the scale arranged at these annual conferences. Some of the fint glass men here make several varieties of glassware, and if they belonged to all the associations connected with their trade would be kept busy attending to the business of these organizations. This is the reason the Pittsburg Shade men are not in the association of shade manufacturers.

## AN IMPORTANT DECISION.

President Weihe, of the Amalgamated Associntion, Rules on a Point of Interest. A very important question has been asked President Weihe, of the Amalgamated Association, and he answered it at the session of the convention. The question came from the Grievance Committee and was in reference as to what constitutes a double turn and as to whether a helper has a right to claim his old situation after having accepted a better position, being thrown out of employment shortly after. Several cases were cited and President Weihe made the following ruling:

cited and Fresident weihe made the following ruling:

"When a helper, roll hand or any member of this association leaves one situation to go to another, and accepts the latter permanently, he or they cannot lay claim to his or their old situation in the event of the new situation proving a failure. And should the new situation, furnaces, etc., run three successive months—no matter at what period of the year it commences—it then becomes a double turn job, and in the event of said furnace, funaces, roll, etc., being discontinued or stopped, said party or parties working at said furnace. Furnaces, rolls, etc., being thrown out of employment, are entitled.

The American Flint Glass Workers' Union one contributed about \$6,000 toward the relief of the Johnstown flood sufferers. Yesterday President Smith received an additional contribution of \$201.05 from Local Unions Nes. 36 and 78, the result of an entertainment given at Phillipsburg. He also received \$20 from Murray's factory, \$185 from Rohrbacher's and \$80 from Gillender's, all in Philadelphia. DON'T WANT PLUCK-ME'S.

The River Miners Meet and Stand by the Railroad Diggers' Decision. The miners of the Monongabela Valley held a delegate convention yesterday at Byers' Hall, Monengabela City, to consider the price for mining and the store order question.

mining and the store order question. There were 42 delegates present, representing 38 mines out of 65 located along the river.

Master Workman Jenkins presided, and after the delegates had been seated the price for mining was discussed. It was unanimously decided to insist on the 3-cent rate in the first three pools and 23 cents in the Fourth pool, to take effect and continue after July 1. It was also decided that work be suspended for a period of ten days, to give the operators an opportunity to consider the matter. If the price is not granted a strike will be ordered.

The company or "pluck-me" store question

is not granted a strike will be ordered.

The company or "pluck-me" store question was next discussed. National Secretary Watchorn, of N. T. A. 185, K. of L., and General Executive Boarder John Costello spoke on the subject at length.

After a discussion on the question the following resolutions were adopted:

Resolved, That we are unalterably opposed to the store-order system, and that we units heart and hand with the railroad miners in the crusade against this cyli.

THOSE FOREIGN GLASS BLOWERS,

Secretary Windom Orders a Thorough

Investigation. W. J. Brennan, Esq., has gone to Washing ton and laid the case of the violation of the contract labor law before Secretary of the contract labor law before Secretary of the Treasury Windom by the importation of foreign window glass blowers. It is alleged that the foreign blowers, who are now at work at Jeannette, didleome over at the request of President James Campbell, of the Window Glass Workers' Association, and at the request of James Chambers, of Chambers & McKee.

Secretary Windom ordered that the papers in the case be sent to Boston where the men inneed and a fail investigation will be made. When the result of this investigation is received Secretary Windom will make his decision.

cision.

President Campbell is not worried at all over the investigation and says he is ready for any decision that may be made.

This term is often applied to people whose nerves are abnormally sensitive. They should strengthen them with Hostetter's Stomach Bitters. After a course of that benign tonic, they will cease to be conscious that they have nervous systems, except through agreeable sonsations. It will enable them to eat, sleep and digest well, the three media for increasing tone and vigor in the nerves, in common with the rest of the system. The mental worry begotten by nervous dyspepsia will also disappear.

Some People Think a Canal to Lake Erie Worth More Than the

IMPROVEMENT OF THE OHIO.

Coal Shippers See No Hope in the Sky, but Senator Quay Promises Help.

GOVERNOR BEAVER AND THAT CANAL

It has leaked out that there was more in that conference between coa operators of this city and Senator Qua than at first reported. According to Captain L. N. Bunton, of Joseph Walton & Co., the feature N. Bunton, of Joseph Walton & Co., the feature of a canal to Lake Erie was a matter of secondary importance, the real object of the conference being to devise ways and means to get rid of tolls on the Monongahela river and consult as to further improvement of the Ohio. As the proposition to make a canal to Lake Erie is a pet measure in Beaver county, some people guessed that this was the prime object of the conference but Mr. Bunton says it wasn't. Monangahela river, cost of long and difficult navigation, the extra price paid for mining, ex

navigation, the extra price paid for mining, extra compared with other places, and finally extra cost of plant, or rather of product, and in consequence the heavy weights in the trade are casting about for relief.

What the men who sat up with the junior Senator of Pennsylvania do not tell might fill a volume, perhaps, but they admit that they talked about Monongahela river tolls. Mr. I. N. Bunton states that Mr. Quay promised to do what he could for them. He also stated that the canal to the lake was talked of, but says there was no definite logomachy respecting it, as it is being pushed by other influences, and anyhow will not assume definite shape until after the commission appointed makes report.

It is quietly whispered in some localities that the canal project is a favorite wrinkle of Gov ernor Beaver, and that he proposes to have his

But although there is considerable unanimity of opinion as to the bad condition of the river coal trade of Pittsburg there are slightly divergent views respecting it. Mr. T. P. Morgan finds the greatest drawback to consist in the Irregularity of prices in down-river ports, and says that were a moderate price established and maintained a fair amount of money might be made in the trade. He also states that the local coal trade, that of Pittsburg and Allegheny, is gradually coming back as the price of natural gas grows. Anyone fairly fixed in life will consent to increased cost and use of meter in his family consumption, but much increase in price becomes a serious matter in a large factory, and Mr. Morgan expects to see the Pittsburg coal trade arise again from its ashes before many years. As the Cambria Iron Company alone used about 4,00,000 bushels of coal a year before it began using gas, an idea of what Pittsburg consumption would be may be had, as many of her heaviest factories can take coal directly from the rivers.

Mr. George P. Thurston states that the Pitts 

her heaviest factories can that the Pitta-from the rivers.

Mr. George P. Thurston states that the Pitta-burg river coal trade amounts to 110,000,000 bushels a year, and the handling of it gives occupation to an army four or five times as large as that with which General Taylor won the battle of Buena Vista.

The expression "carrying coals to New-castle" was once supposed to express the most complete idea of busithe most complete idea of ness stupidity, but according than compensating. An idea of the development in Alabama may be had by comparison of a few figures and dates. According to census reports the coal output in Alabama was 11,000 tous, and in 1886 it was estimated all the way from 1,800,000 to 2,500,000, while the whole amount shipped through the Monongahela locks that year was but 4,123,945 tons, and when Alabama produced but 11,000 tons the shipments through these same locks was 2,303,856 tons, or over 200,000 tons more than half in 1870 of what it was in 1886.

Mr. Walton states that the greatleverage the Alabamians have is that under the operation of their laws they keep their penal institutions full of convict labor and that labor to mine coal costs nothing except board and clothing, and much of it is utilized in mining. ensating. An idea of the devel

THE GREAT KANAWHA BEAR. burg has at present, and will have for some time to come, is the region up the Kanawha river, in West Virginia, at least one might sup-pose its opposition the most powerful. Many of the owners of coal lands in that section may be said to have gotton them for considerably less than nothing, and 6 to 10-foot veins of coal thrown in on top of that, or rather under, as the timber above will be worth several times the cost of the iand. Those who know what Allegheny and Westmoreland coal land has cost, or for that matter, any of the coal land worked in Western Pennsylvania can appreciate the disadvantage with which Western Pennsylvania operators labor in this respect. Mr. C. Kimberland tells of land in West Virginia owned by the Marmet Company which cost \$6 an acre and which has \$0.000 feet of lumber on it to the acre, exclusive of tie timber. And below this timber but a small way are coal veins 4 to 14 feet thick scattered over a large portion of country.

veins 4 to 14 feet thick scattered over a large portion of country.

In the Kanawha sections a half cent is saved on mining, and three-eighths of a cent on shipment, compared with Pittsburg coal, seven-eighths cents altogether, with shipping water a much greater part of the year than here, and a safer channel. These two items of cost alone make a difference in favor of West Virginia of \$110,000 a year as against Pittsburg operators, and then added to this are the tolls on the Monongahela river, which cost such firms as the Browns and Walton & Co. each \$18,000 to \$20,000 a year.

This is one interest that it would seem no one power can corner in its entirety. England may speculate as to the time when the coal of the world will give out, but in this country its vastness gives us the feeling of the 12-year-old boy who is more afraid of a whipping than he is of Tophet's terrors, for they seem to him a long way off. Before our coal is exhausted we will have time to grow a dozen forests as large as any the nioneers ever saw.

THE PROPOSED DITCH.

conference, but Mr. Bunton says it wasn't.
The river coal trade of Pittsburg is in a bad
way, not for want of money to operate, nor for
a market, but for want of a paying market,
one which will stand the cost of tolls on the

THE GOVERNOR SAID TO BE IN IT.

name linked with it as its praises "go echoing down the corridors of time." Well, whatever down the corridors of time." Well, whatever His Excellency's motive may be, efforts in that behalf will be appreciated in this neighborhood. The commission's work will be to make a preliminary survey and report feasibility, if any, and cost. Mr. Benton states that he knows of no discussion relative to the motive power that will be used should a canal be built, and seemed to think that not only will there be no trouble on this score, but also that there will be pienty of time to discuss the best method of cooking the hare when it has been found.

But although there is considerable unanimity of opinion as to the bad condition of the river

THE TROUBLE IS NOT rant of a market, but of a paying one; hence the desire to get to the lake regions, where

Mr. Joseph Walton, carrying coals to the South is now but little better and in a short time will be even more unprofitable. There is saie for all the coal that our fleets can carry, but the product must compete with one which, though inferior, can be put on the Southern market at a cost that consumers consider more than compensation. An idea of the develop-

But, perhaps, the greatest competitor Pitts.

may be said to have gotton them for consider-

IT IS OF GENERAL INTEREST. Mr. Kimberland points out the fact that the iron men are even more interested in a canal to Lake Erie than are the coal operators, for they must have cheap ore carriage if they are to maintain their supremacy, and it will suit the coal men to sell their product here as well as anywhere else, if they can get a market.

The total production of the West Virginia mines was 4,005,796 tons in 1886, which is within 200,009 tons, or 5,000,000 bushels of that which came through the locks of the Monongahela that year.
